Dimensions of Competency refer to the types of skills a person must have to perform effectively in a broad capacity. The dimensions of competency ensure the person being assessed has the skills to perform competently in a variety of different circumstances. To be competent, a person must demonstrate the following:

Task Skills	The skills needed to perform a task at an acceptable level. They include knowledge and practical skills, and these are usually described in the performance criteria.

Principles of Assessment means assessment decisions are based on the principles of fairness, flexibility, validity and reliability, which definitions of each of these as outlined below:

Fairness	<p>The individual learner's needs are considered in the assessment process. Where appropriate, reasonable adjustments are applied by the RTO to take into account the individual learner's needs.</p> <p>The RTO informs the learner about the assessment process and provides the learner with the opportunity to challenge the result of the assessment and be reassessed if necessary.</p>
Flexibility	<p>Assessment is flexible to the individual learner by:</p> <ul style="list-style-type: none"> • Reflecting the learner's needs; • Assessing competencies held by the learner no matter how or where they have been acquired; and <p>□ Drawing from a range of assessment methods and using those that are appropriate to the context, the unit of competency and associated assessment requirements, and the individual.</p>

Training and Assessment Policy & Procedures

Validity	Any assessment decision of the RTO is justified, based on the evidence of the performance of the individual learner. Validity requires: <ul style="list-style-type: none"> • assessment against the unit(s) of competency and the associated assessment requirements covers the broad range of skills and knowledge that are essential to competent performance. • assessment of knowledge and skills is integrated with their practical application; • assessment to be based on evidence that demonstrates that a learner could demonstrate these skills and knowledge in other similar situations; and • Judgement of competence is based on evidence of learner performance that is aligned to the unit/s of competency and associated assessment requirements.
Reliability	Evidence presented for assessment is consistently interpreted and assessment results are comparable irrespective of the assessor conducting the assessment.

Reasonable adjustment means a modification made to the learning environment, training or assessment methods used to enable students with a disability to access and participate in training on the same basis as those without a disability. The adjustment must be 'reasonable' in that it must not impose unjustifiable hardship on the person or the RTO.

Recognition of Prior Learning or RPL means an assessment process that assesses the competency(s) of an individual that may have been acquired through formal, non-formal and informal learning to determine the extent to which that individual meets the requirements specified in the training package of VET accredited courses. For definitions of formal, non-formal and informal learning, refer to the definitions in ASQA's User's Guide for the Standards for Registered Training Organisations 2015.

RTO means Registered Training Organisation

Rules of Evidence means that the evidence on which an assessment decision is based is valid, sufficient, authentic and current, with definitions for each as outlined below:

Validity	The assessor is assured that the learner has the skills, knowledge and attributes as described in the module or unit of competency and associated assessment requirements.
Sufficiency	The assessor is assured that the quality, quantity and relevance of the assessment evidence enables a judgment to be made of a learner's competency
Authenticity	The assessor is assured that the evidence presented for assessment is the learner's own work.
Currency	The assessor is assured that the assessment evidence demonstrates current competency. This requires the assessment evidence to be from the present or the very recent past.
